

AI Engineer

Nexus AI Labs

LOCATION: Bangalore, India | On-site

ABOUT THE ROLE

Nexus AI Labs is hiring an AI Engineer to build and deploy production-grade AI/ML systems. You will work on LLMs, RAG pipelines, and intelligent automation solutions.

RESPONSIBILITIES

- Build and fine-tune LLM-based applications using OpenAI, Anthropic, or open-source models
- Design and implement RAG (Retrieval Augmented Generation) pipelines
- Develop vector search solutions using Pinecone, Weaviate, or FAISS
- Integrate AI capabilities into existing products via APIs
- Monitor model performance and implement feedback loops
- Collaborate with product and engineering teams on AI features

REQUIRED SKILLS

- 2+ years of experience in AI/ML engineering
- Strong Python programming skills
- Hands-on experience with LLMs (GPT-4, Claude, LLaMA, Mistral)
- Experience building RAG systems and prompt engineering
- Familiarity with vector databases (Pinecone, FAISS, Chroma)
- Knowledge of ML frameworks: LangChain, LlamaIndex

PREFERRED SKILLS

- Experience with model fine-tuning (LoRA, QLoRA)
- MLOps knowledge (MLflow, Weights & Biases)
- Familiarity with HuggingFace ecosystem
- Cloud deployment experience (AWS SageMaker, GCP Vertex AI)

EDUCATION: B.Tech/M.Tech in CS, AI, or related field

EXPERIENCE: 2–5 years
