

ServiceNow Engineer

CloudOps Global

LOCATION: Chennai, India | On-site

ABOUT THE ROLE

CloudOps Global is looking for an experienced ServiceNow Engineer to implement, customize, and maintain ServiceNow platform solutions for our enterprise clients.

RESPONSIBILITIES

- Develop and customize ServiceNow applications and modules (ITSM, ITOM, HRSD, CSM)
- Write server-side and client-side scripts using JavaScript/GlideScript
- Design and build workflows, flow designer processes, and business rules
- Integrate ServiceNow with third-party tools via REST/SOAP APIs
- Perform platform upgrades and maintain instance health
- Gather requirements from stakeholders and translate to technical solutions
- Create technical documentation and train end-users

REQUIRED SKILLS

- 3+ years of ServiceNow development experience
- Strong JavaScript and GlideScript knowledge
- Experience with ITSM modules: Incident, Problem, Change, CMDB
- ServiceNow Certified System Administrator (CSA) certification
- Experience with Flow Designer, Business Rules, Client Scripts
- REST/SOAP API integration experience

PREFERRED SKILLS

- ServiceNow Certified Application Developer (CAD) certification
- Experience with ITOM, Discovery, or Service Mapping
- Knowledge of HRSD or Customer Service Management (CSM)
- Scripted REST APIs and MID Server configuration

EDUCATION: B.Tech/B.E. in any engineering discipline

EXPERIENCE: 3–6 years
